1. How to Read the Diagrams

This document contains the entity relationship diagrams (ERDs) for the CyneForm platform database. There are **76 tables in nine domains** with **137 foreign-key relationships**. Each domain has one or more diagrams followed by the relationships that cross into other domains.

Table 1-1. Diagram key

Symbol	Meaning
Navy header box	A table. Its name is in the header.
PK	Primary key column.
FK	Foreign key column that points to another table.
Arrow with a forked end	Many-to-one link. The forked (crow's foot) end sits on the table that holds the foreign key; the arrow points at the parent table. The label on the line is the foreign key column.
Dashed grey box	A table that belongs to another domain, shown only so the link can be drawn.
Column types	MariaDB types. UUIDs are char(36) generated by the application (UUIDv7), times are datetime(3) in UTC, money is decimal(15,2), flexible data is JSON.
Columns shown	Up to ten key columns per table to keep diagrams readable. The full column list of every table is in the data dictionary.

1.1 Domains at a glance

Table 1-2. Domains

Domain	Tables	Purpose
Identity & Access	14	People, roles, permissions, sessions, sign-in security, account status, leave, mailbox requests.
Lead Harvester & Outreach	8	Lead sources, harvest runs, leads, claims, outreach and quality flags.
CRM & Deals	13	CRM entries, contacts, stages, follow-ups, evidence, bookings, deals, payments, webhooks.
Points & Rules Engine	8	Versioned rule sets, rules, simulations, points ledger, manual adjustments.
Compensation, Rollover & Bonus	8	Revenue periods, cap phases, commission, slices, rollover, performance bonus, daily metrics.
Phantom Equity	5	Grants, vesting, valuation marks, milestones, payouts.
Training & Calendar	7	Training folders and files, access rules, views, meetings, attendance.
Reporting & Notifications	6	Weekly reports, admin reports, notification templates, notifications, deliveries, preferences.
Platform, Audit & Compliance	8	Files, audit log, settings, maintenance, job runs, retention, data-subject requests, holidays.

2. Domain Landscape

How the nine domains refer to each other. Identity and the file store are referenced from almost everywhere, so those links are summarised rather than drawn individually in the domain diagrams.

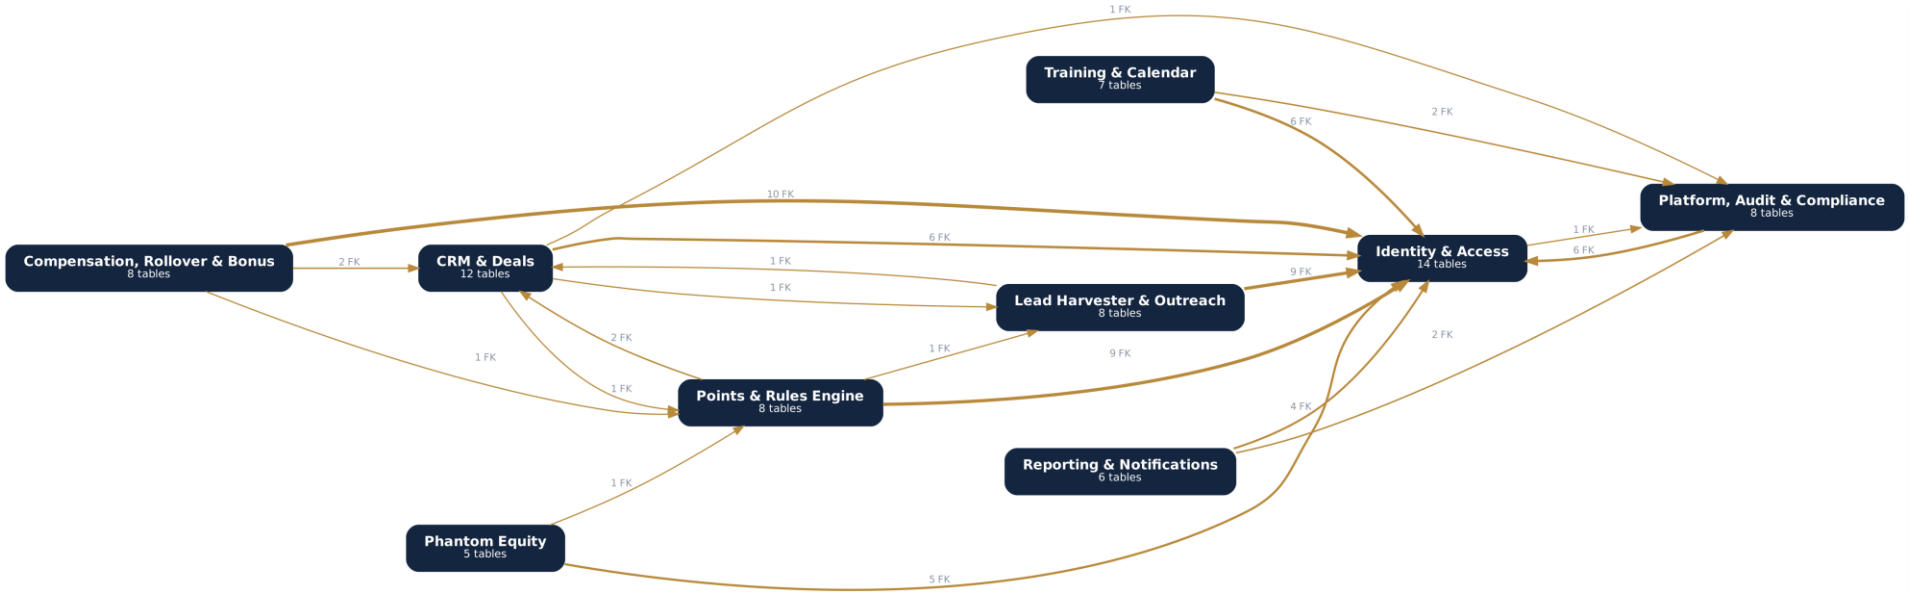

Figure 2-1. Domain landscape

3. Entity Relationship Diagrams

3.1 Identity & Access (14 tables)

Tables: `users`, `user_profiles`, `roles`, `permissions`, `role_permissions`, `user_permission_overrides`, `auth_sessions`, `otp_challenges`, `one_time_links`, `password_history`, `login_attempts`, `account_status_events`, `leave_requests`, `mailbox_provisioning_jobs`.

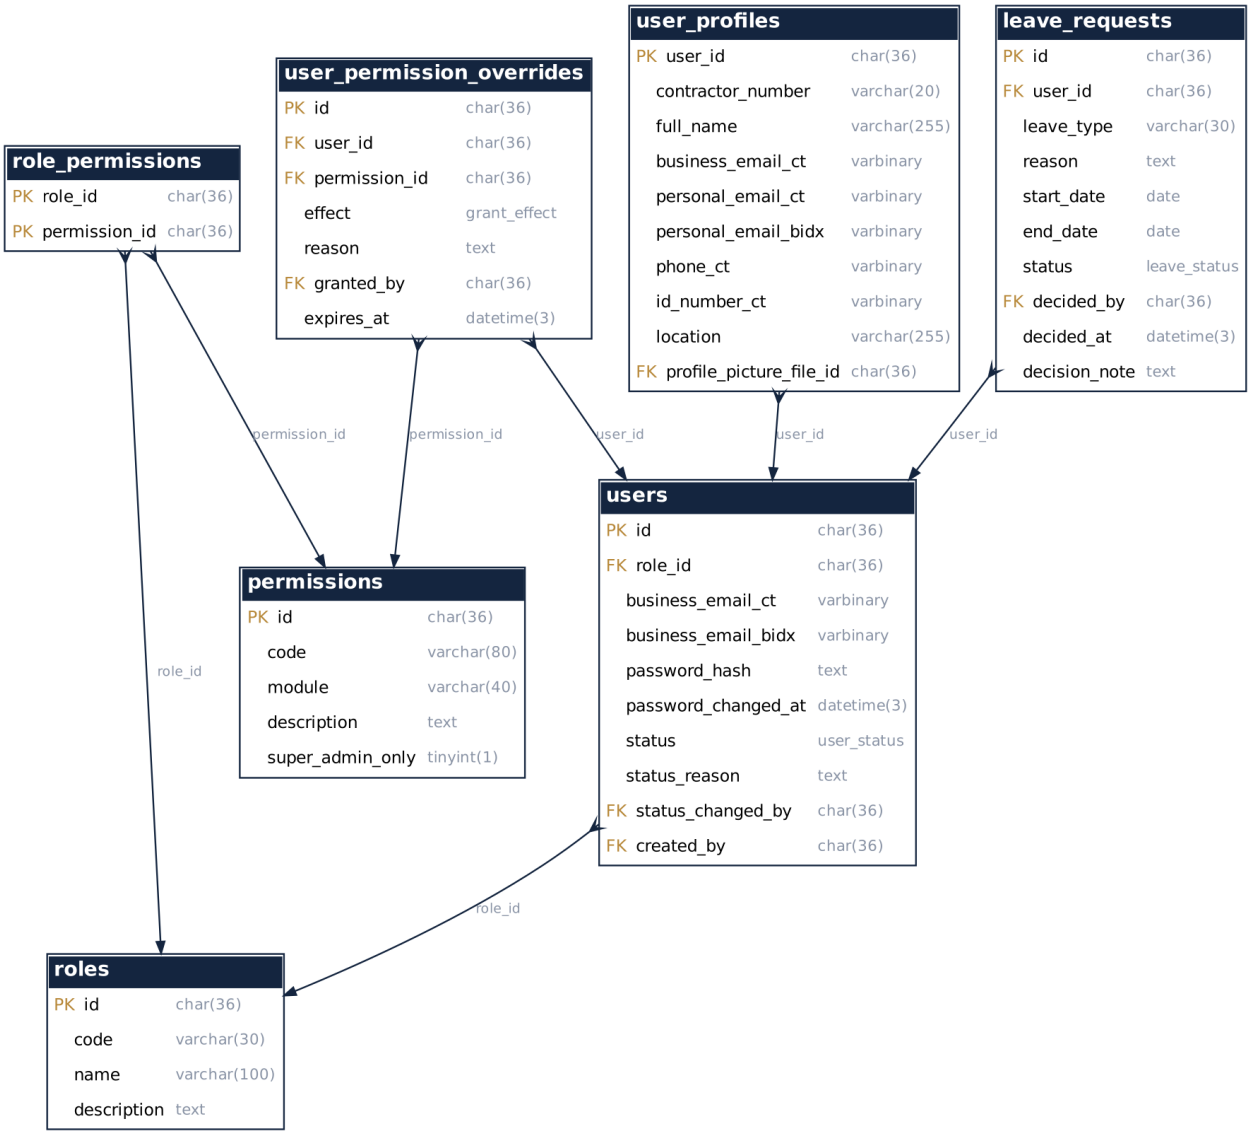

Figure 3-1. Identity & Access, part A: users, roles and permissions

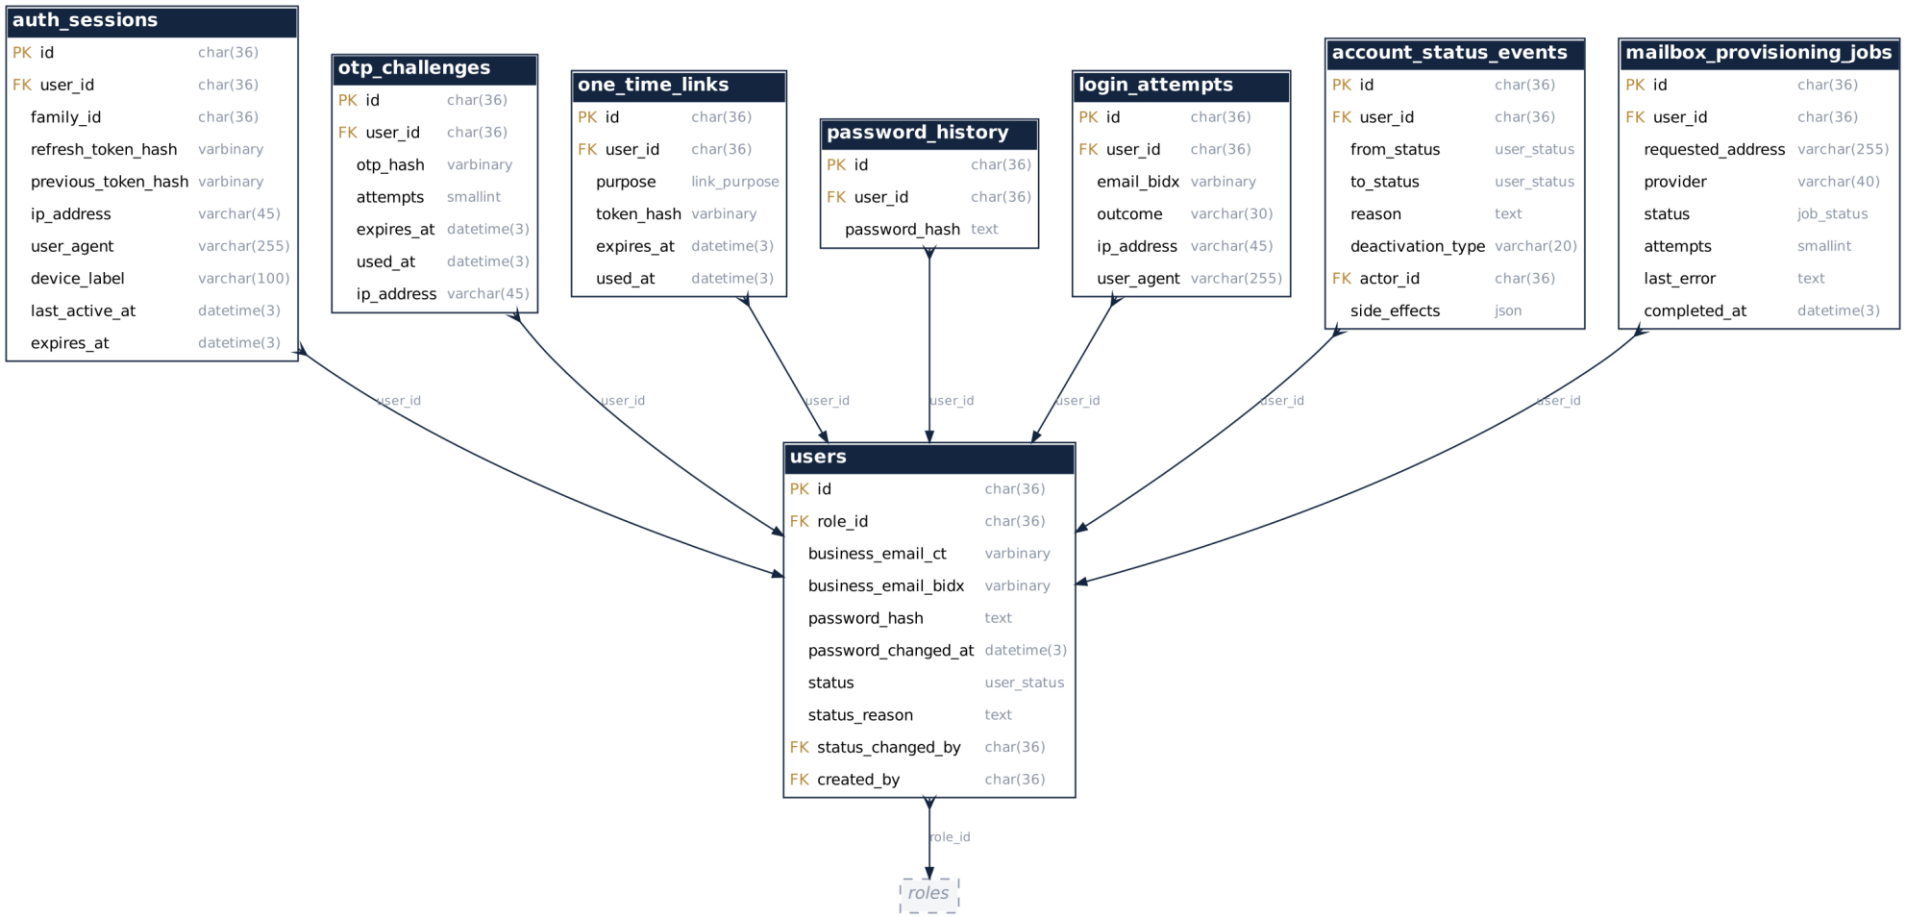

Figure 3-2. Identity & Access, part B: sessions, security and lifecycle

3.2 Lead Harvester & Outreach (8 tables)

Tables: `lead_sources`, `harvest_runs`, `leads`, `lead_claims`, `lead_events`, `outreach_submissions`, `outreach_channels`, `quality_flags`.

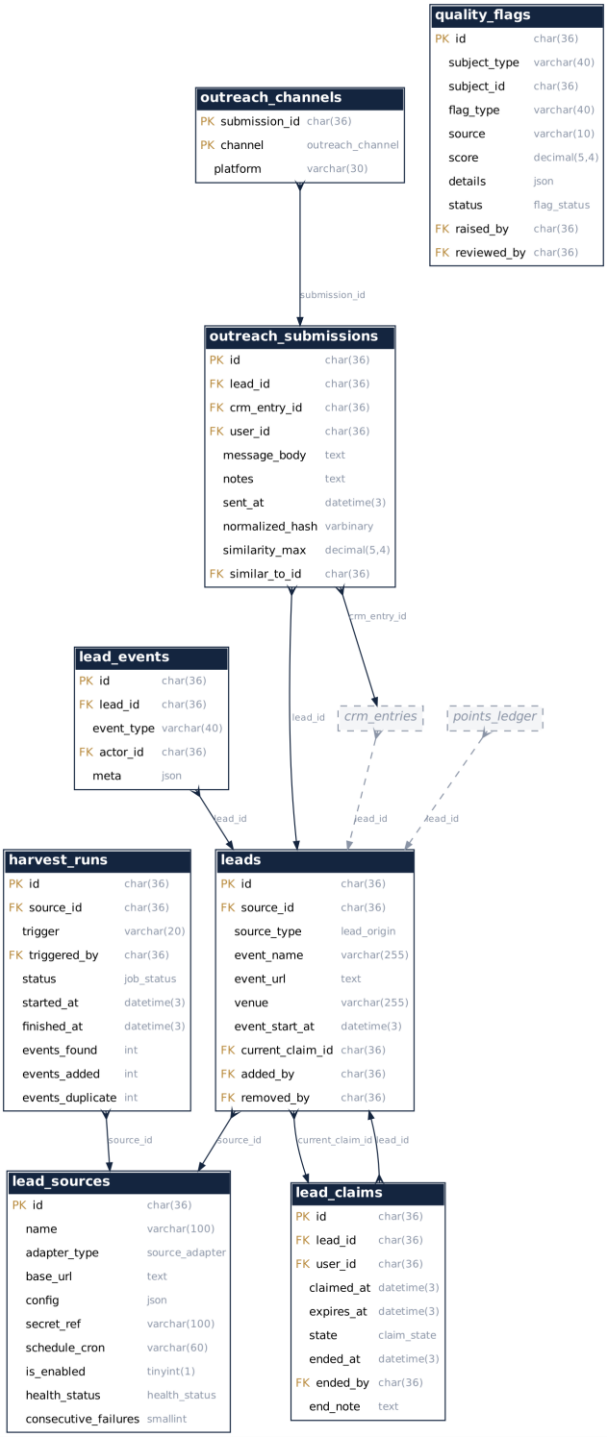

Figure 3-3. Lead Harvester & Outreach

Table 3-1. Links from Lead Harvester & Outreach to other domains (excluding users and files)

Table	Column	Points to	In domain
`outreach_submissions`	`crm_entry_id`	`crm_entries`	CRM & Deals

3.3 CRM & Deals (12 tables)

Tables: `client_sectors`, `sector_keyword_rules`, `crm_entries`, `crm_contacts`, `crm_stage_events`, `crm_followups`, `crm_evidence`, `crm_notes`, `call_bookings`, `deals`, `deal_payments`, `webhook_events`.

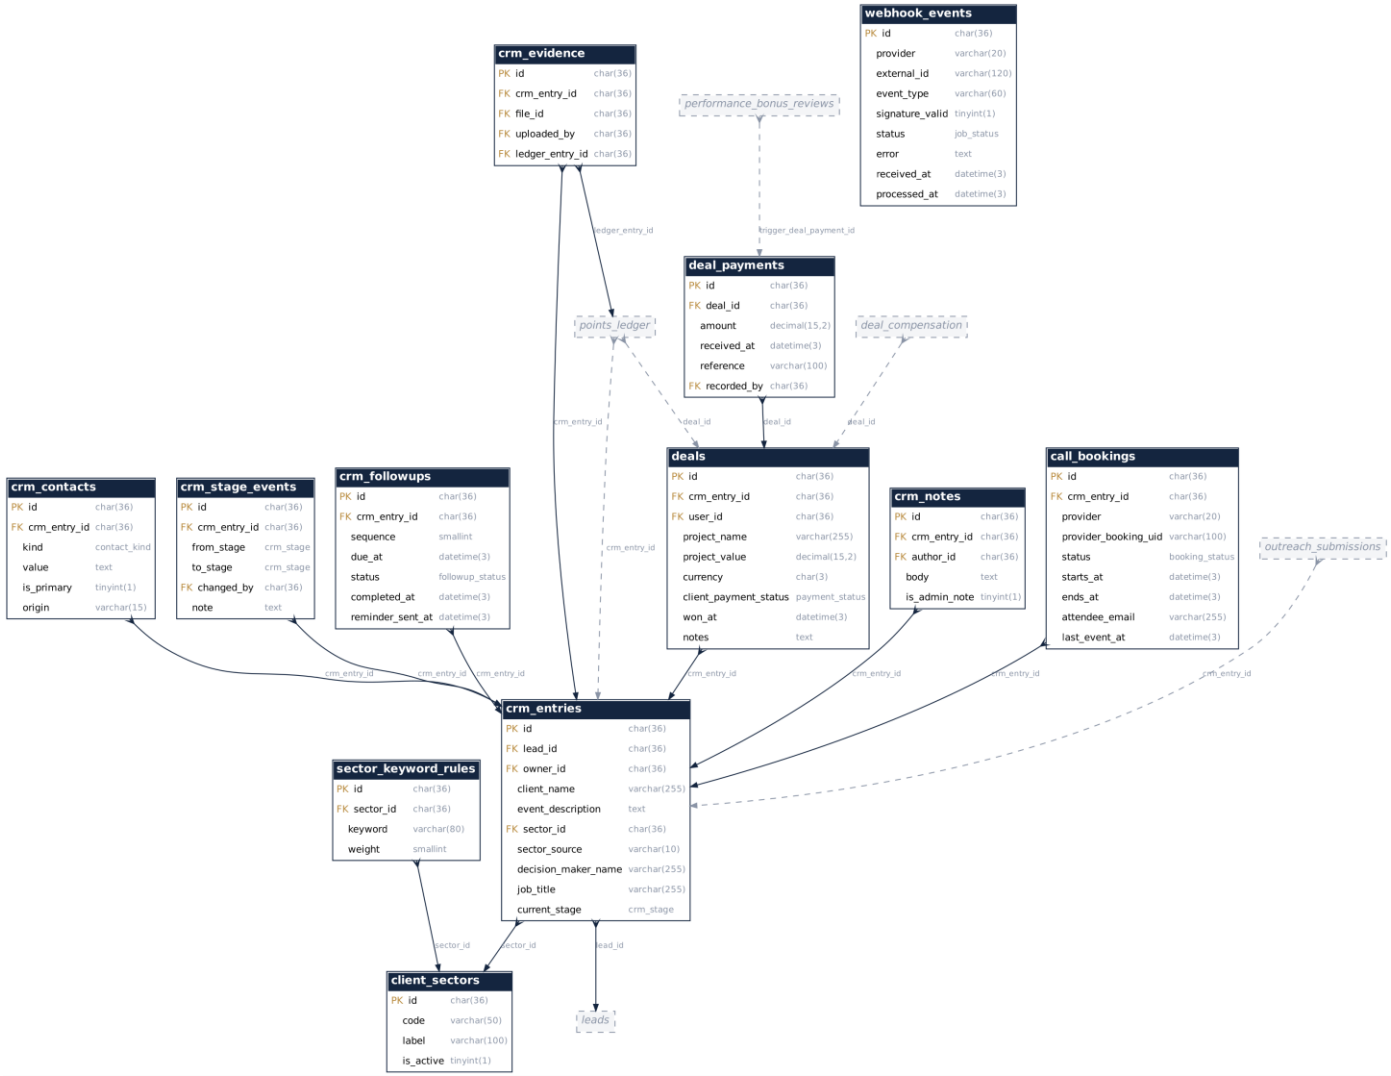

Figure 3-4. CRM & Deals

Table 3-2. Links from CRM & Deals to other domains (excluding users and files)

Table	Column	Points to	In domain
`crm_entries`	`lead_id`	`leads`	Lead Harvester & Outreach

Table	Column	Points to	In domain
crm_evidence	ledger_entry_id	points_ledger	Points & Rules Engine

3.4 Points & Rules Engine (8 tables)

Tables: `rule_sets`, `rule_set_pillars`, `rules`, `rule_changes`, `rule_simulations`, `point_activity_types`, `points_ledger`, `manual_adjustments`.

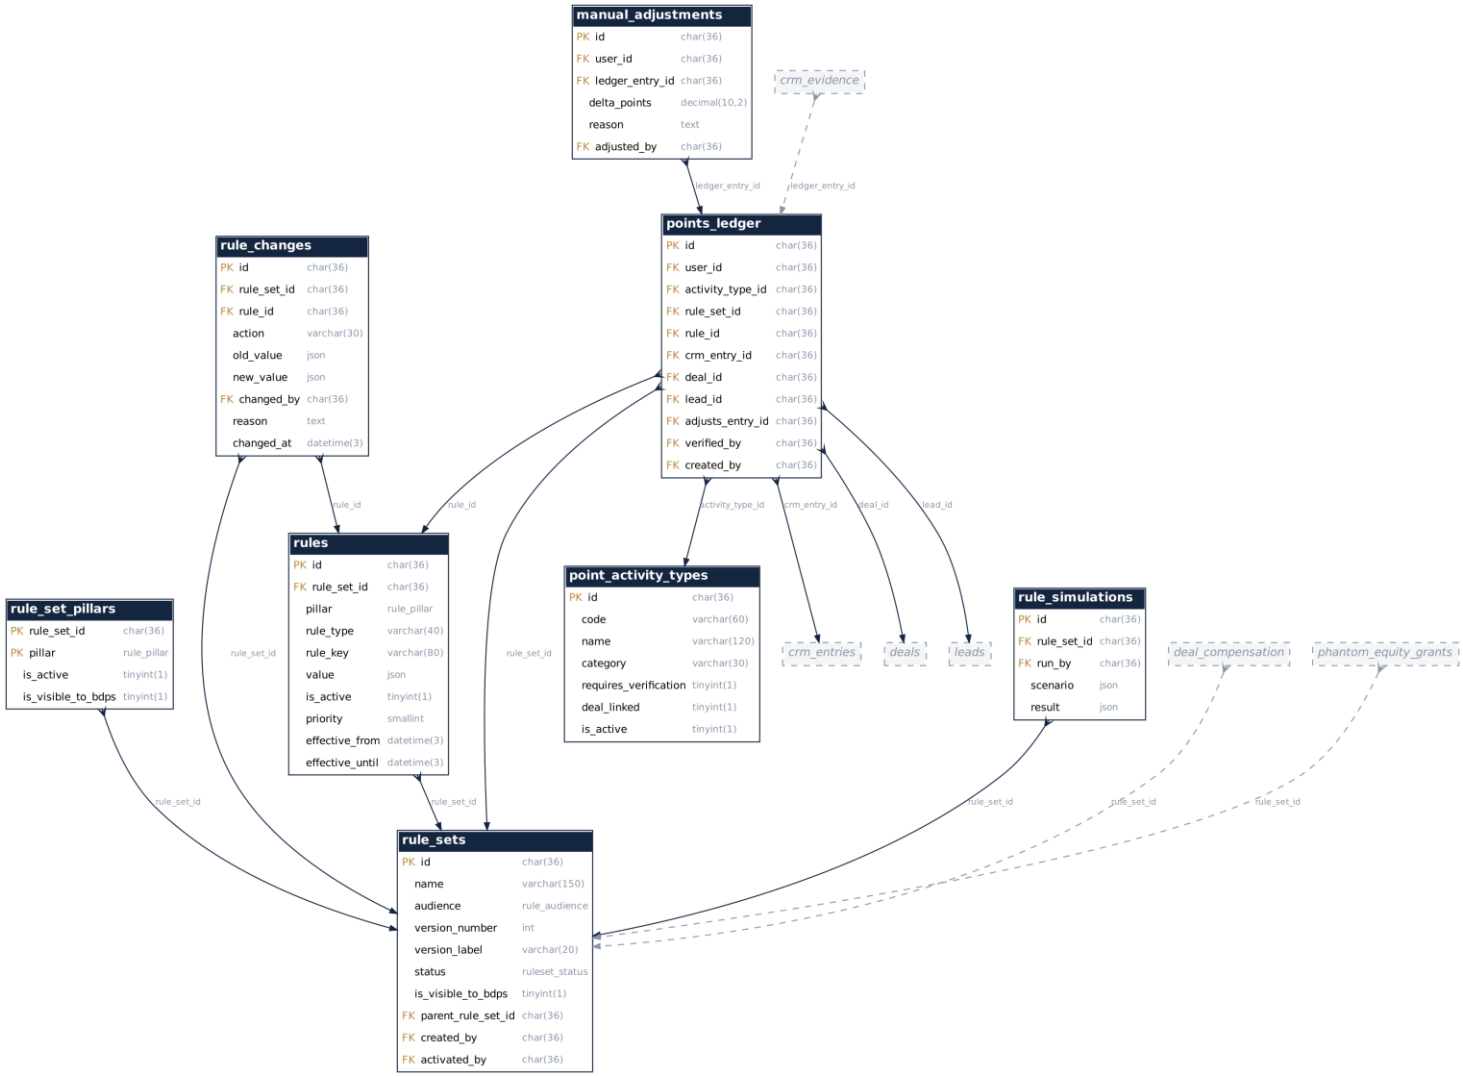

Figure 3-5. Points & Rules Engine

Table 3-3. Links from Points & Rules Engine to other domains (excluding users and files)

Table	Column	Points to	In domain
`points_ledger`	`crm_entry_id`	`crm_entries`	CRM & Deals
`points_ledger`	`deal_id`	`deals`	CRM & Deals
`points_ledger`	`lead_id`	`leads`	Lead Harvester & Outreach

3.5 Compensation, Rollover & Bonus (8 tables)

Tables: `revenue_periods`, `bdp_cap_phase_assignments`, `deal_compensation`, `deal_commission_slices`, `rollover_entries`, `rollover_applications`, `performance_bonus_reviews`, `bdp_metrics_daily`.

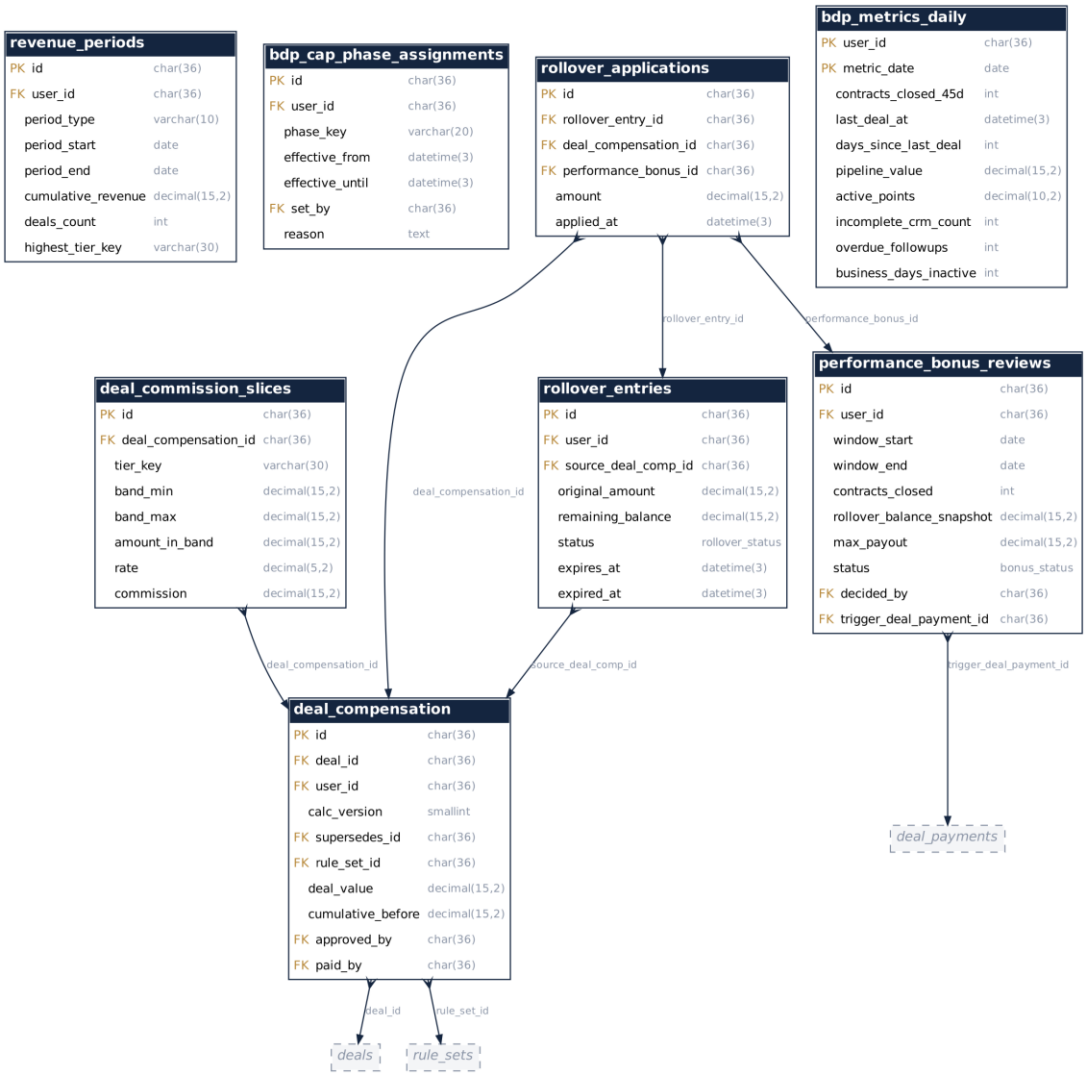

Figure 3-6. Compensation, Rollover & Bonus

Table 3-4. Links from Compensation, Rollover & Bonus to other domains (excluding users and files)

Table	Column	Points to	In domain
`deal_compensation`	`deal_id`	`deals`	CRM & Deals

Table	Column	Points to	In domain
`deal_compensation`	`rule_set_id`	`rule_sets`	Points & Rules Engine
`performance_bonus_reviews`	`trigger_deal_payment_id`	`deal_payments`	CRM & Deals

3.6 Phantom Equity (5 tables)

Tables: `phantom_equity_grants`, `equity_vesting_schedule`, `company_valuation_marks`, `equity_milestone_events`, `equity_payouts`.

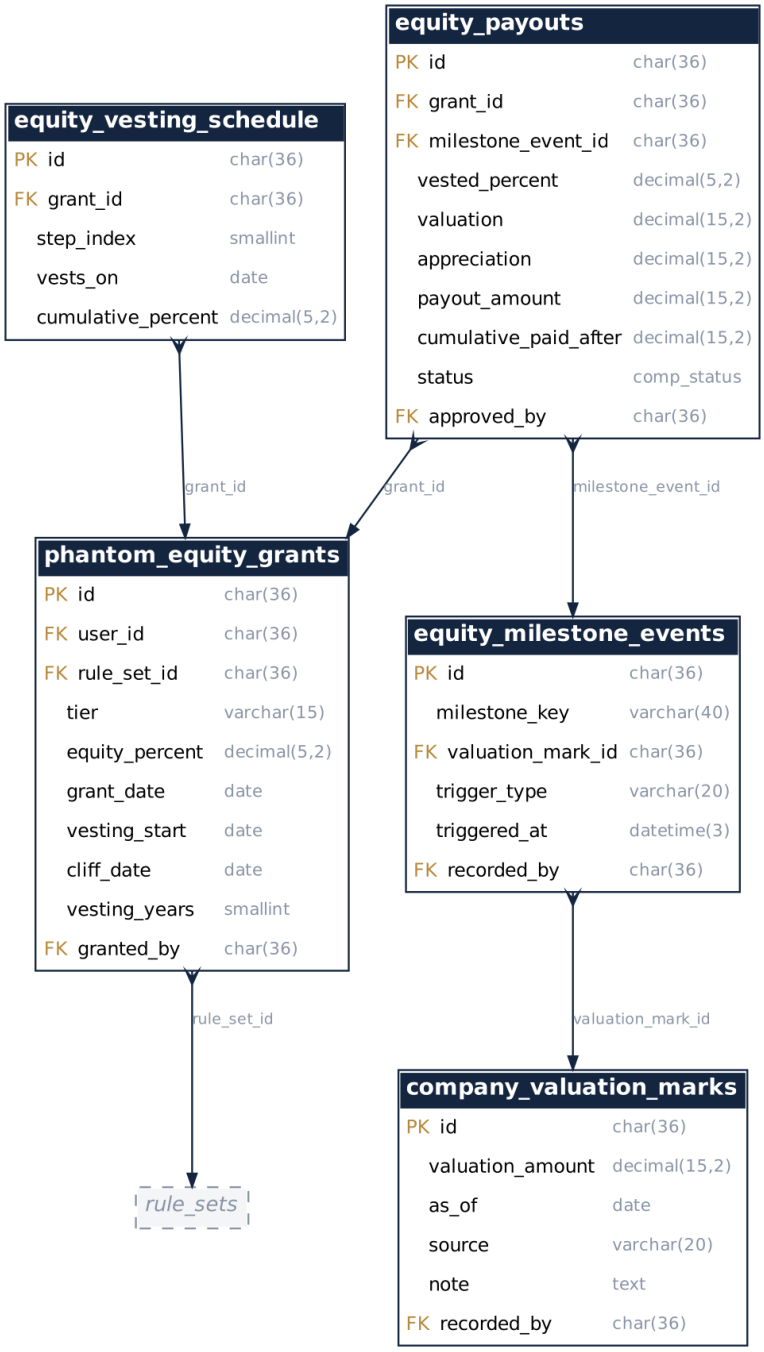

Figure 3-7. Phantom Equity

Table 3-5. Links from Phantom Equity to other domains (excluding users and files)

Table	Column	Points to	In domain
`phantom_equity_grants`	`rule_set_id`	`rule_sets`	Points & Rules Engine

3.7 Training & Calendar (7 tables)

Tables: `training_folders`, `training_files`, `training_access_rules`, `training_views`, `meetings`, `meeting_occurrences`, `meeting_attendees`.

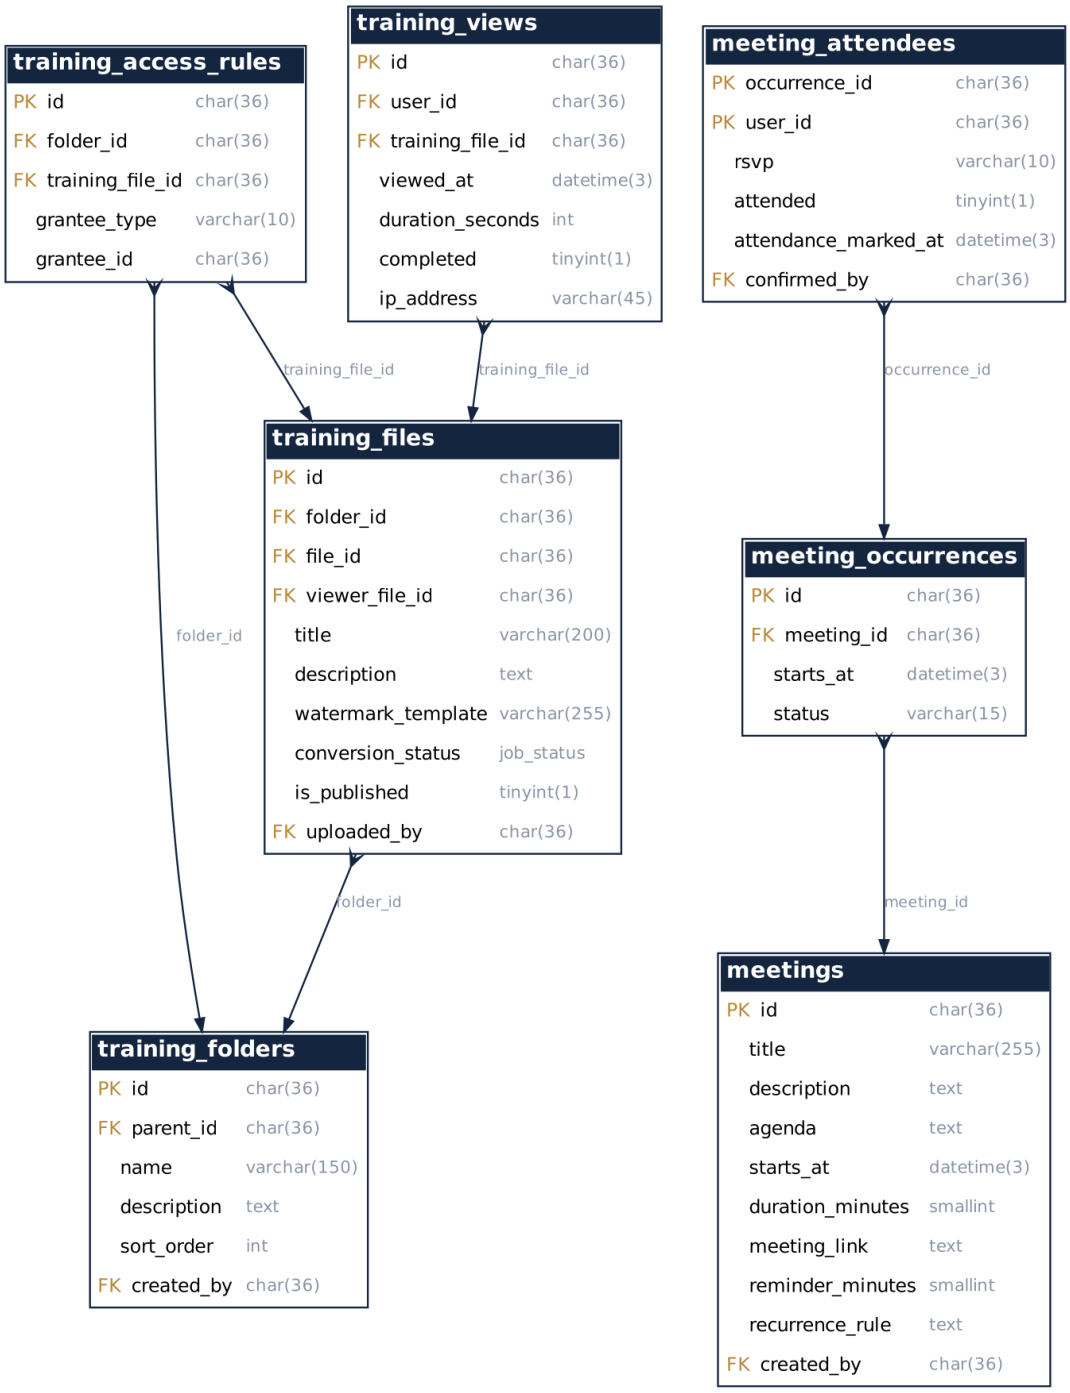

Figure 3-8. Training & Calendar

3.8 Reporting & Notifications (6 tables)

Tables: `weekly_reports`, `admin_report_runs`, `notification_templates`, `notifications`, `notification_deliveries`, `notification_preferences`.

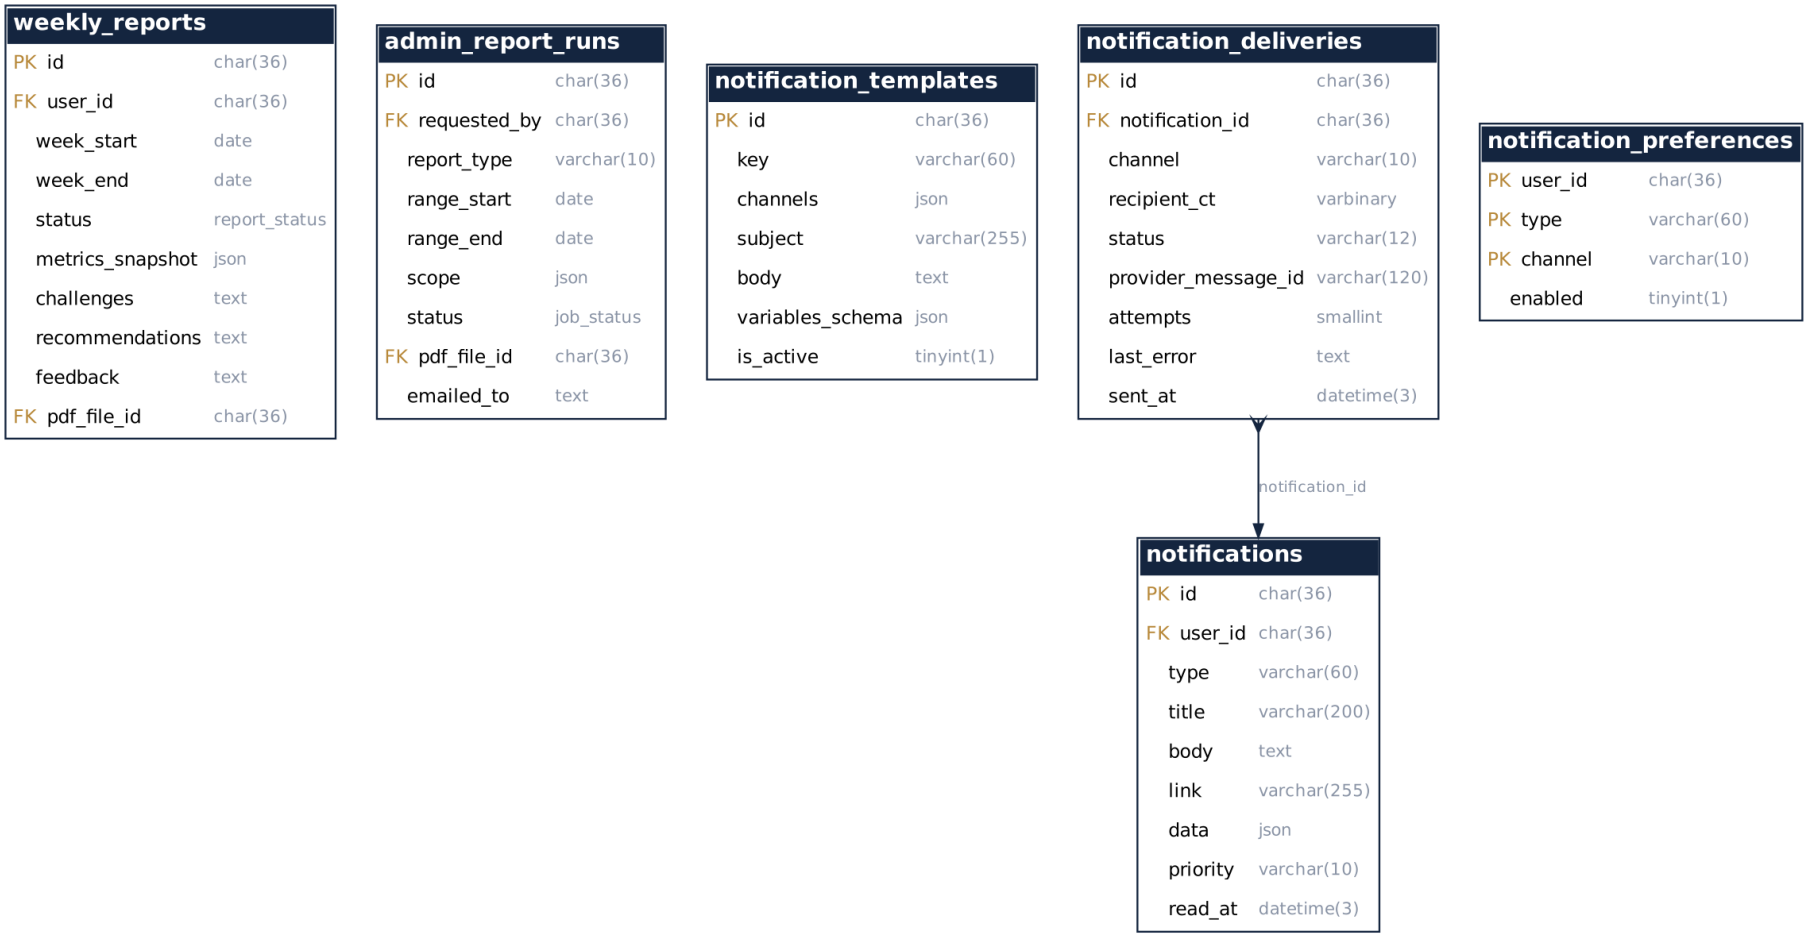

Figure 3-9. Reporting & Notifications

3.9 Platform, Audit & Compliance (8 tables)

Tables: `files`, `audit_logs`, `system_settings`, `maintenance_windows`, `job_runs`, `retention_policies`, `data_subject_requests`, `public_holidays`.

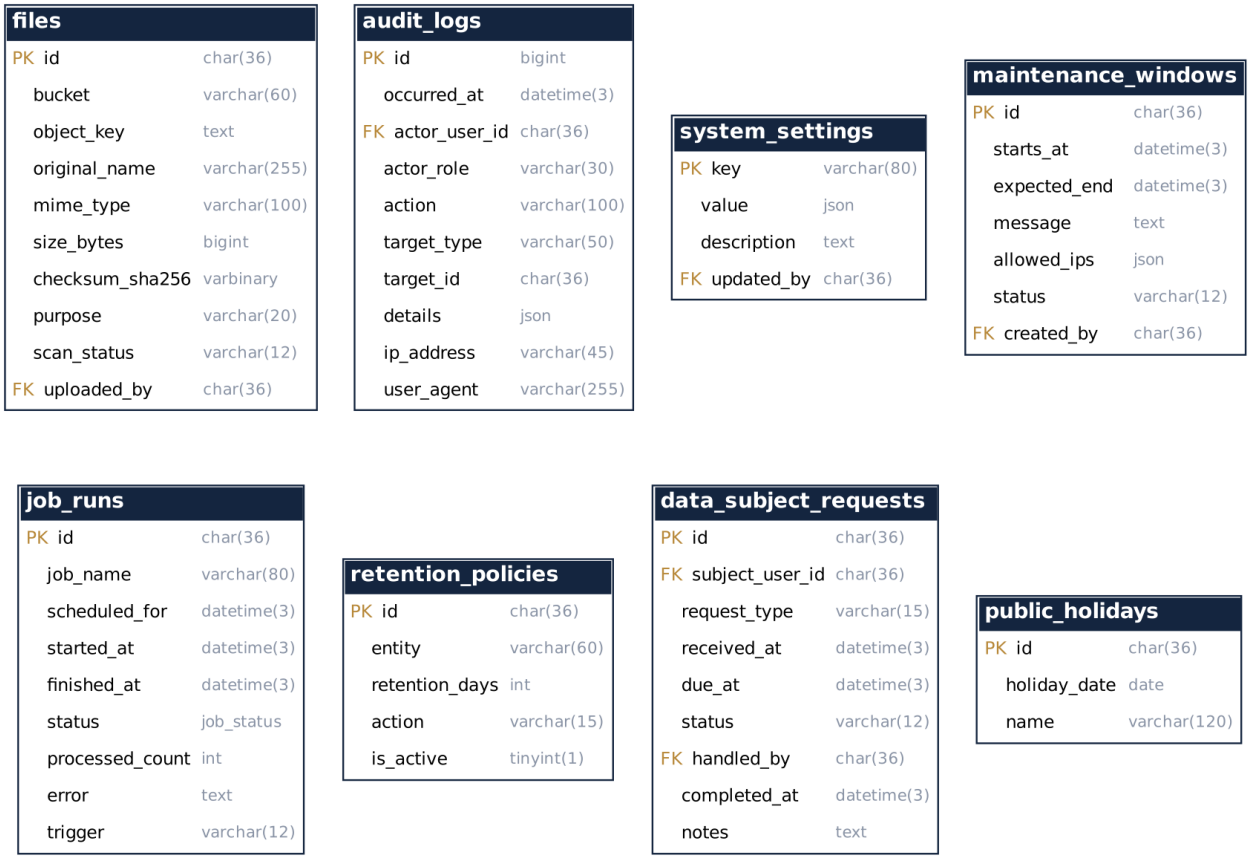

Figure 3-10. Platform, Audit & Compliance

4. Data Dictionary Index

Every table with its columns. Columns ending in _ct are encrypted; columns ending in _bidx are blind indexes used for lookups.

4.1 Identity & Access

Table	Columns
users	id, role_id, business_email_ct, business_email_bidx, password_hash, password_changed_at, status, status_reason, status_changed_at, status_changed_by, freeze_started_at, failed_login_count, locked_until, last_login_at, last_login_ip, login_count, created_by, created_at, updated_at, deleted_at
user_profiles	user_id, contractor_number, full_name, business_email_ct, personal_email_ct, personal_email_bidx, phone_ct, id_number_ct, location, profile_picture_file_id, enc_key_id, cap_phase_hint, updated_at
roles	id, code, name, description
permissions	id, code, module, description, super_admin_only
role_permissions	role_id, permission_id
user_permission_overrides	id, user_id, permission_id, effect, reason, granted_by, created_at, expires_at
auth_sessions	id, user_id, family_id, refresh_token_hash, previous_token_hash, ip_address, user_agent, device_label, last_active_at, expires_at, revoked_at, revoke_reason, created_at
otp_challenges	id, user_id, otp_hash, attempts, expires_at, used_at, ip_address, created_at
one_time_links	id, user_id, purpose, token_hash, expires_at, used_at, created_at
password_history	id, user_id, password_hash, created_at
login_attempts	id, user_id, email_bidx, outcome, ip_address, user_agent, created_at
account_status_events	id, user_id, from_status, to_status, reason, deactivation_type, actor_id, side_effects, created_at
leave_requests	id, user_id, leave_type, reason, start_date, end_date, status, decided_by, decided_at, decision_note, created_at
mailbox_provisioning_jobs	id, user_id, requested_address, provider, status, attempts, last_error, completed_at, created_at

4.2 Lead Harvester & Outreach

Table	Columns
lead_sources	id, name, adapter_type, base_url, config, secret_ref, schedule_cron, is_enabled, health_status, consecutive_failures, last_run_at, last_success_at, compliance_note, created_at, updated_at
harvest_runs	id, source_id, trigger, triggered_by, status, started_at, finished_at, events_found, events_added, events_duplicate, http_status, error_message
leads	id, source_id, source_type, event_name, event_url, venue, event_start_at, description, organizer_name, raw_data, dedupe_hash, status, current_claim_id, added_by, removed_by, removed_reason, archived_at, created_at, updated_at
lead_claims	id, lead_id, user_id, claimed_at, expires_at, state, ended_at, ended_by, end_note
lead_events	id, lead_id, event_type, actor_id, meta, created_at
outreach_submissions	id, lead_id, crm_entry_id, user_id, message_body, notes, sent_at, normalized_hash, similarity_max, similar_to_id, detector_version, detector_status, quality_state, created_at
outreach_channels	submission_id, channel, platform
quality_flags	id, subject_type, subject_id, flag_type, source, score, details, status, raised_by, raised_at, reviewed_by, reviewed_at, review_note

4.3 CRM & Deals

Table	Columns
client_sectors	id, code, label, is_active
sector_keyword_rules	id, sector_id, keyword, weight
crm_entries	id, lead_id, owner_id, client_name, event_description, sector_id, sector_source, decision_maker_name, job_title, current_stage, alignment_call_booked_at, expected_value, expected_close_date, is_completed, completed_at, points_total_cached, won_at, lost_at, lost_reason, archived_at, version, created_at, updated_at
crm_contacts	id, crm_entry_id, kind, value, is_primary, origin, created_at
crm_stage_events	id, crm_entry_id, from_stage, to_stage, changed_by, note, created_at
crm_followups	id, crm_entry_id, sequence, due_at, status, completed_at, reminder_sent_at
crm_evidence	id, crm_entry_id, file_id, uploaded_by, ledger_entry_id, created_at
crm_notes	id, crm_entry_id, author_id, body, is_admin_note, created_at
call_bookings	id, crm_entry_id, provider, provider_booking_uid, status, starts_at, ends_at, attendee_email, raw_payload, last_event_at
deals	id, crm_entry_id, user_id, project_name, project_value, currency, client_payment_status, won_at, notes, created_at, updated_at
deal_payments	id, deal_id, amount, received_at, reference, recorded_by, created_at
webhook_events	id, provider, external_id, event_type, signature_valid, payload, status, error, received_at, processed_at

4.4 Points & Rules Engine

Table	Columns
rule_sets	id, name, audience, version_number, version_label, status, is_visible_to_bdps, parent_rule_set_id, effective_from, effective_to, change_reason, created_by, activated_by, activated_at, created_at
rule_set_pillars	rule_set_id, pillar, is_active, is_visible_to_bdps
rules	id, rule_set_id, pillar, rule_type, rule_key, value, is_active, priority, effective_from, effective_until, display_order, created_at, updated_at
rule_changes	id, rule_set_id, rule_id, action, old_value, new_value, changed_by, reason, changed_at
rule_simulations	id, rule_set_id, run_by, scenario, result, created_at
point_activity_types	id, code, name, category, requires_verification, deal_linked, is_active
points_ledger	id, user_id, activity_type_id, rule_set_id, rule_id, crm_entry_id, deal_id, lead_id, entry_kind, adjusts_entry_id, points, cash_per_point, cash_equivalent, status, earned_at, expires_at, verification_required, verification_due_at, verified_by, verified_at, source_ref, idempotency_key, created_by, note, created_at
manual_adjustments	id, user_id, ledger_entry_id, delta_points, reason, adjusted_by, created_at

4.5 Compensation, Rollover & Bonus

Table	Columns
revenue_periods	id, user_id, period_type, period_start, period_end, cumulative_revenue, deals_count, highest_tier_key, updated_at
bdp_cap_phase_assignments	id, user_id, phase_key, effective_from, effective_until, set_by, reason, created_at
deal_compensation	id, deal_id, user_id, calc_version, supersedes_id, rule_set_id, deal_value, cumulative_before, cumulative_after, commission_amount, deal_points_total, cash_per_point, points_value, rollover_applied, pre_cap_total, cap_phase_key, cap_rate, cap_amount, final_payout, rollover_generated, status, breakdown, calculated_at, approved_by, approved_at, paid_by, paid_at, payment_reference, cancel_reason

Table	Columns
deal_commission_slices	id, deal_compensation_id, tier_key, band_min, band_max, amount_in_band, rate, commission
rollover_entries	id, user_id, source_deal_comp_id, original_amount, remaining_balance, status, created_at, expires_at, expired_at
rollover_applications	id, rollover_entry_id, deal_compensation_id, performance_bonus_id, amount, applied_at
performance_bonus_reviews	id, user_id, window_start, window_end, contracts_closed, rollover_balance_snapshot, max_payout, status, authorized_amount, decided_by, decided_at, decision_note, trigger_deal_payment_id, paid_at, payment_reference, created_at
bdp_metrics_daily	user_id, metric_date, contracts_closed_45d, last_deal_at, days_since_last_deal, pipeline_value, active_points, incomplete_crm_count, overdue_followups, business_days_inactive

4.6 Phantom Equity

Table	Columns
phantom_equity_grants	id, user_id, rule_set_id, tier, equity_percent, grant_date, vesting_start, cliff_date, vesting_years, baseline_valuation, status, qualification_snapshot, granted_by, grant_reason, terminated_at, created_at
equity_vesting_schedule	id, grant_id, step_index, vests_on, cumulative_percent
company_valuation_marks	id, valuation_amount, as_of, source, note, recorded_by, created_at
equity_milestone_events	id, milestone_key, valuation_mark_id, trigger_type, triggered_at, recorded_by
equity_payouts	id, grant_id, milestone_event_id, vested_percent, valuation, appreciation, payout_amount, cumulative_paid_after, status, approved_by, paid_at, payment_reference, created_at

4.7 Training & Calendar

Table	Columns
training_folders	id, parent_id, name, description, sort_order, created_by, created_at
training_files	id, folder_id, file_id, viewer_file_id, title, description, watermark_template, conversion_status, is_published, uploaded_by, created_at
training_access_rules	id, folder_id, training_file_id, grantee_type, grantee_id
training_views	id, user_id, training_file_id, viewed_at, duration_seconds, completed, ip_address
meetings	id, title, description, agenda, starts_at, duration_minutes, meeting_link, reminder_minutes, recurrence_rule, status, created_by, created_at
meeting_occurrences	id, meeting_id, starts_at, status
meeting_attendees	occurrence_id, user_id, rsvp, attended, attendance_marked_at, confirmed_by

4.8 Reporting & Notifications

Table	Columns
weekly_reports	id, user_id, week_start, week_end, status, metrics_snapshot, challenges, recommendations, feedback, setbacks, next_week_calls, pdf_file_id, submitted_at, on_time, created_at
admin_report_runs	id, requested_by, report_type, range_start, range_end, scope, status, pdf_file_id, emailed_to, created_at
notification_templates	id, key, channels, subject, body, variables_schema, is_active, updated_at
notifications	id, user_id, type, title, body, link, data, priority, read_at, created_at
notification_deliveries	id, notification_id, channel, recipient_ct, status, provider_message_id, attempts, last_error, sent_at
notification_preferences	user_id, type, channel, enabled

4.9 Platform, Audit & Compliance

Table	Columns
files	id, bucket, object_key, original_name, mime_type, size_bytes, checksum_sha256, purpose, scan_status, uploaded_by, created_at, deleted_at
audit_logs	id, occurred_at, actor_user_id, actor_role, action, target_type, target_id, details, ip_address, user_agent, request_id, prev_hash, row_hash
system_settings	key, value, description, updated_by, updated_at
maintenance_windows	id, starts_at, expected_end, message, allowed_ips, status, created_by
job_runs	id, job_name, scheduled_for, started_at, finished_at, status, processed_count, error, trigger
retention_policies	id, entity, retention_days, action, is_active
data_subject_requests	id, subject_user_id, request_type, received_at, due_at, status, handled_by, completed_at, notes
public_holidays	id, holiday_date, name

5. All Foreign Keys

The complete list of 137 relationships. "Required" means the column cannot be empty.

Domain	Table	Column	References	Required
